Headquartered in Hong Kong,

The Screens Guru is one of the first art and technology incubators for emerging artists in the region.

Its team of art, data, startup and social media experts from Hong Kong and Australia match artists with advanced technologies to accelerate innovation in art creation, curation, and collection.

The Screens Guru sees Hong Kong as the hub of art and technology collaboration that can create unprecedented value for the art and technology sectors through art and technology exchange.

In its launching art and technology showcase, The Screens Guru partnered with WAVE, Hong Kong's first non-fungible token (NFT) artist collective,

to launch a 360-degree exhibition and auction experience for the NFT collection, with Art Basel, digital out-of-home (DOOH) at Harbour City, Gallery by the Harbour, and Opensea.io.

The Screens Guru's upcoming initiative is an open-source database of patron of digital art to promote appreciation and collection of innovative art.

Founded by Professor Moshe Szyf at McGill University in 2016, **HKG Epitherapeutics Ltd.** is dedicated to harness the untapped power of epigenetics in molecular diagnostics. The company is launching three novel proprietary non-invasive tests targeting healthy individuals, including epiLiver for early risk assessment of liver cancer, epiCervix for early risk assessment of cervical cancer and epiAging for measuring biological age. All of the tests target consumers in Hong Kong, Asia and the global market.

The company has invested in its expansion and built a new testing facility at HKSTP to comply with Clinical Laboratory Improvement Amendments (CLIA), College of American Pathologists (CAP) and International Organisation

for Standardisation (ISO) certification requirements. The expansion will create 10 new jobs including senior lab technicians, medical laboratory technologists (MLT), automation experts, quality control and regulatory affairs professionals.

HKG Epitherapeutics has initiated a new round of fundraising to further expand its research and development, global marketing and test services to be headquartered in Hong Kong.

Based in Hong Kong, **Lumière Project** offers finance solutions for the entertainment industry. Lumière's solutions operate as technological bricks that considerably lower investment risks for recorded media investors. Investors can now test the impact of their intellectual property (IP) before production, which can easily track the flow of capital, and attract new capital through rights tokenisation

Lumière connects these opportunities by offering executives and independent producers the possibility to monitor their productions remotely and in real-time. Impactful entertainment and creative

content can be made at affordable costs, which creates more job opportunities in Hong Kong, and develop transparent practices in the entertainment industry.

The company aims to lower and syndicate the risk for movie investors, which opens the gates to a wider marketplace for film finance and production. It hopes to bring the entire value chain of film including financing, production, distribution and exploitation into blockchain.
